

WEBINAR COUNTS AS 1 CPE

# NASA CYBER SECURITY WEBINAR

**TOPIC:** Collaborating Securely in a Remote Workplace

**DATE:** Thursday, May 28, 2020

**TIME:** 2:00 – 3:30 pm Eastern  
1:00 – 2:30 pm Central  
11:00 – 12:30 pm Pacific

## WEBINAR OVERVIEW:

Unexpectedly, many of us have been compelled to become remote workers. With the stay at home orders in place across the country, the necessity to telework has become the new normal. Learning how to connect and collaborate remotely is easier said than done.

As teleworking tools have become essential for us to remain productive, innovative and support NASA's missions, it has become increasingly important to understand how to effectively use applications such as Microsoft Teams and SharePoint in our daily operations. And while remote access has given us the ability to continue our work uninterrupted, it has also opened the Agency up to more risks and vulnerabilities.

Under the current mandatory telework situation, is it possible to continue to be productive, work collaboratively and minimize risks? Join us as we discuss how to optimize the tools provided by NASA to work safely and confidently in today's current state.

## TAKEAWAYS:

- Simple ways to increase productivity and work safely.
- Increase your understanding of collaboration tools provided by NASA that are being used to optimize our remote working experience.
- How your use of the tools can minimize risks

## FEATURING:

**Luis Bares, IT Project Management,  
NASA KSC**  
**Barbara Jo Webb, Community Manager,  
SAIC/MSFC**

Luis Bares began his work at Kennedy Space Center thirteen years ago supporting the Shuttle Program. Upon retirement of the program, Luis transitioned to IT Project Management and led KSC's work in communications, imagery modernization and the development of project management guidance for NASA. Since 2015, Luis has served as the Agency Collaboration Lead and paved the way for large-scale IT deployments such as Office365, Box and external collaboration initiatives aimed at optimizing NASA's IT capabilities and securing NASA data. Luis is a graduate of the University of Central Florida, holding both a Bachelors and Master's Degree.

Barbara Jo Webb began her work at Marshall Space Flight Center in 2016 and served in a role on the Office365 Phase 2 Implementation and Training team. She currently works for the Agency Applications Office in support of Enterprise Collaboration tools, with an emphasis on training and communication. Barbara Jo is also implementing case management software for NASA's Office of General Counsel (OGC) for NASA attorneys to work together in a safe environment across the Agency.

## To Register:

Log into SATERN and search for ITS-NASA in the catalog. Select the NASA Cyber Security Webinar entry. Select the register tab. Make sure to confirm registration. **Questions? Contact: [ITSATC@lists.nasa.gov](mailto:ITSATC@lists.nasa.gov)**
