Dear Ms. Scheehle,

On behalf of meeting sponsors NASA (National Aeronautics and Space Administration) and NEIR (Korea's National Institute of Environmental Research), I am pleased to invite you to participate in the TEMPO/GEMS Joint Science Workshop which will be held at the Courtyard King Kamehameha's Kona Beach Hotel, Kailua-Kona, HI, USA from August 26-30, 2024. More information about this event can be found at the following URL: <https://meeting-info.org/tempo-gems-2024/>

We look forward to your participation, and to collaborating with you and your organization on scientific issues. I'm sure this workshop will provide good opportunities to discuss a variety of issues including TEMPO data's substantial potential for CARB applications: wildland fire chemistry, urban and agricultural NOx sources and transport, O3 chemical regimes, etc. This is especially important as we strive to lower the annual PM2.5 levels to the new 2024 NAAQS.

Sincerely,

A handwritten signature in black ink that reads "Lynn Kennedy". The signature is written in a cursive, flowing style.

Lynn Kennedy
