Flight Time:	6.5 hours		
Log Number:	168002	PI:	Steven Wofsy
Funding Source:	Jennifer Olson - NASA - SMD - ESD - ESSP Mission Manager		
Purpose of Flight:	Check		
Comments:	The flight was very successful for science. This included 4 vertical profiles, MMS maneuvers, and 3 sets of low, cruise, & high speed runs. After a quick learning curve, we had good success using CPDLC with Oceanic ATC getting IFR block altitudes and leaving and re-entering IFR controlled airspace at the lower altitudes. The hum from the TOGA instrument was still apparent although at slightly different flight conditions for this case with the aft body removed. The aircraft and science instruments returned in good shape.
