

## P-3 Orion 04/10/17

Aircraft: [P-3 Orion - WFF](#) (See full schedule)

Flight Number: Science Flight #19- North Central Gap 3

Payload Configuration: OIB Arctic

Nav Data Collected: No

Total Flight Time: 7.8 hours

Submitted by: Kelly Griffin on 04/10/17

### Flight Segments:

<b>From:</b>	BGTL	<b>To:</b>	BGTL
<b>Start:</b>	04/10/17 11:00 Z	<b>Finish:</b>	04/10/17 18:45 Z
<b>Flight Time:</b>	7.8 hours		
<b>Log Number:</b>	<a href="#">17P006</a>	<b>PI:</b>	Nathan Kurtz
<b>Funding Source:</b>	Bruce Tagg - NASA - SMD - ESD Airborne Science Program		
<b>Purpose of Flight:</b>	Science		

### Flight Hour Summary:

	<b>17P006</b>
<b>Flight Hours Approved in SOFRS</b>	333.6
<b>Total Used</b>	332
<b>Total Remaining</b>	1.6

## OIB - P-3 Orion 04/10/17 Science Report

**Mission:** OIB

**Mission Summary:**

Mission: North Central Gap 03 (high priority, last flown 2013)

This mission, along with the North Central Gap 02 and 03 missions, are primarily designed to fill a gap in altimetry and radar coverage of the north-central portion of the Greenland Ice Sheet. In this flight, we also re-occupy centerlines of the Qeqertarsuap and Upernavik (south), glaciers, we fly centerlines of the Drachmann and Wordie glaciers, and we re-fly portions of the northwest coast-parallel grid flown from 2010-2012.

Weather across central Greenland was very favorable today. No clouds were encountered below our flight level and nearly all of the day was cloud-free on the ice sheet. All four outlet glacier center flowlines were flown, with only minor turbulence encountered. We also flew one additional center flowline on the west coast (Upernavik Central), instead of turning around and repeating Upernavik South. All instruments performed well. A minor issue was detected for the primary DMS camera so we switched to the backup camera half-way through the flight. ATM reports 100% data collection. The JPL crew collected a lot of 360° footage, and we also collected 360° footage from a camera that was mounted at the bottom of the drop-sonde tube.
