

## P-3 Orion 05/08/17

**Aircraft:**

P-3 Orion - WFF ([See full schedule](#))

**Flight Number:**

Science Flight #37-Southeast Glaciers 01 (High Priority)

**Payload Configuration:**

OIB Arctic

**Nav Data Collected:**

No

**Total Flight Time:**

8 hours

**Submitted by:**

Cate Easmunt on 05/08/17

**Flight Segments:**

<b>From:</b>	BGSF	<b>To:</b>	BGSF
<b>Start:</b>	05/08/17 10:15 Z	<b>Finish:</b>	05/08/17 18:17 Z
<b>Flight Time:</b>	8 hours		
<b>Log Number:</b>	<a href="#">17P006</a>	<b>PI:</b>	Nathan Kurtz
<b>Funding Source:</b>	Bruce Tagg - NASA - SMD - ESD Airborne Science Program		
<b>Purpose of Flight:</b>	Science		

**Flight Hour Summary:**

	<b>17P006</b>
<b>Flight Hours Approved in SOFRS</b>	333.6
<b>Total Used</b>	332
<b>Total Remaining</b>	1.6

## OIB - P-3 Orion 05/08/17 Science Report

**Mission:**

OIB

**Mission Summary:**

Mission: Southeast Glaciers 01 (priority: high; last flown: 2015)

This mission is a near-repeat of the 2012/2013/2014 Southeast Glaciers mission. Its primary purpose is to continue dh/dt monitoring of 10 glaciers in the southeast which have been flown since 2008, and two additional glaciers in the south near the Pursortoq peninsula first flown in 2012. We also occupy an ICESat line between the southernmost glacier and Kangerlussuaq, and an east-west master grid line between the northernmost glacier and Kangerlussuaq. We overfly four PROMICE sites near Kangerlussuaq. For 2015, we added new lines on the Ikertivaq-N and Ikertivaq-NN channels of Ikertivaq Glacier, since the original line was not optimally placed. The original line is nevertheless retained here for dh/dt continuity purposes. This had been a baseline OIB flight, but was demoted in 2016 because of its unsuitability to be flown from high altitude during the melt season campaigns.

A mostly overcast Greenland with a gap in the southeast and light winds favored this challenging mission. Early networking troubles between the navigation system and the pilot's yoke-mounted tablets were quickly overcome by John Sonntag. The forecast was as predicted, and we experienced mostly clear skies all along the coast and minor turbulence only when meeting the fronts of a couple of steep glaciers, including Ikertivaq-NN. All instruments performed well and ATM reported 100% data collection. High cross-winds near Kangerlussuaq precluded a ramp pass today and offered us the jolt that we'd originally expected on the glacier runs. Some loose pieces of equipment were tossed around but we all continued unharmed on a smooth landing.
