Comments:

ATom-3 Science Flight RF08 SCCI-FHAW. This flight included 5 vertical profile maneuvers out of a planned 3. The flight concluded with a spiral down maneuver from 41kft over Ascension Island to correlate with a TCCON ground site. During the spiral maneuver, at 10kft, the aircraft flew level for 5 minutes to sample a layer of pollution from African biomass burning. CPDLC was not available for this flight due to a mostly system-wide outage. HF#1 radio was not working, so all oceanic ATC communication was done with HF#2 radio. Other than that, the aircraft arrived at Ascension in good shape. Troubleshooting of HF radio is planned for Ascension. Science instruments did well and it was a very successful science mission.
