Mission: ORACLES

Mission Summary:

Walvis Bay local flight aiming for youngest, densest plume we could reach. Flew essentially along the coast to a study region along 11.5 E, 10 S to 12 S. Coordinated with ER-2 for 3 overpasses. Found a high, young, dense biomass burning plume, underlain by an older BB plume directly atop a thin but pretty uniform stratocumulus cloud deck. Good opportunities to examine aging issues, mixing patterns, and compare ER-2 remote sensing with in-situ data.
