

# **Logistics:**

**Joonyoung Ahn  
Jhony Zavaleta, and Saewung Kim**

# 5 Korean PI Instruments

- What are they?
- Rack engineering
- Inlet engineering
- Collaborator matching
- What specific supports would be necessary?
- Integration: happening in Korea or Palmdale?
- When should the racks with the instrument show up? Need some extra-time for potential trouble shooting?
- Timeline

# Potential Ground Site Augmentation

- Import (ATA-CARNET can be an option... if investigators want a long term observation, NIER can support the import tax exemption just like PANDORA?)
- Power and Space?
- When should the participants be finalized?
